CONSTRUCTION INPUT PRICE INDICES

FOURTH QUARTER 2022 RELEASE

DECEMBER 2022

Construction Input Price Indices for the Fourth Quarter 2022

The Kenya National Bureau of Statistics hereby releases Construction Input Price Indices (CIPI) for the Fourth quarter of 2022. The CIPI comprises of the Building Cost Indices, Civil Engineering Cost Indices and the Overall Construction Cost Indices as shown in Tables 1, 2 and 3, respectively. The indices were generated from price data collected from a representative sample of outlets of construction inputs. The data is collected quarterly, with reference to the 15th day of the mid-month of the quarter.

The Building Cost Index recorded a value of 112.46, which represents a 0.25 per cent increase from the third quarter of 2022. The slight increase in the index was attributed to the increase in the prices of building materials like cement, quarry products, fuels and glass products. The prices of reinforcement steel and timber dropped marginally during the review period.

The Civil Engineering Cost Index increased by 0.26 per cent from 114.66 in the third quarter of 2022 to 114.96 in the quarter under review. The rise in Civil Engineering Cost Index was largely due to increase in prices of bitumen products, fuel products, quarry products, and cement.

The Overall Construction Cost Index increased by 0.23 per cent from 113.38 in the third quarter of 2022 to 113.65 in the fourth quarter 2022. This was mainly due to the increase in prices of cement, quarry products and glass products. The cost of hiring/leasing construction equipment eased during the period under review.

The year on year Construction Inflation was 7.10 per cent in the fourth quarter 2022 compared to 3.33 per cent in the fourth quarter 2021. The index rose from

106.12 in the fourth quarter 2021 to 113.65 in the fourth quarter 2022. The highest inflation was in second quarter of 2022 as shown in Table 4.
